8. Map

Attach to this application a topographical map, or other equivalent map, of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all spring, rivers, and other surface water bodies in this map area. See instructions for precise requirements.

9. Facility Drawing

All existing facilities must include a scale drawing of the facility. See instructions for more detail.

10. Photographs

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment, and disposal areas; and sites of future storage, treatment, or disposal areas. See instructions for more detail.

Hazardous Waste Permit Part A Form

Narrative to Item 6. Process Codes and Design Capacities

The Waste Isolation Pilot Plant (**WIPP**) geologic repository is defined as a “miscellaneous unit” under 40 CFR §260.10: *Miscellaneous unit means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of and that is not a container, tank, surface impoundment, waste pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under part 146 of this chapter, containment building, corrective action management unit, unit eligible for research, development, and demonstration permit under 40 CFR 270.65 or staging pile.* The WIPP facility is a geologic repository designed for the disposal of defense-generated transuranic (**TRU**) waste. Some of the TRU wastes disposed of at the WIPP contain hazardous wastes as co-contaminants. More than half the waste to be disposed of at the WIPP facility also meets the definition of debris waste. The debris categories include manufactured goods, biological materials, and naturally occurring geological materials. The WIPP facility has been divided into twelve discrete hazardous waste disposal units (**HWDUs**), ten of which are permitted for disposal under 40 CFR Part 264, Subpart X, *Miscellaneous Units*.

For purposes of this application, all TRU waste is managed as though it were mixed. During the Disposal Phase of the facility, the emplaced TRU mixed waste volume will not exceed the design capacity specified in Item 6, *Process Codes and Design Capacities*. This volume is calculated based on the gross internal volumes of the outermost disposal containers and cannot exceed 189,935 m³ for Panels 1 through 8, 11 and 12. The Land Withdrawal Act (**LWA**) TRU waste volume is tracked and reported by the DOE, internally, for the purposes of compliance with the WIPP LWA total capacity limit for TRU waste of 6.2 million cubic feet (175,564 m³), and is included for informational purposes in Permit Part 4, Table 4.1.1.

The process design capacities for each of the ten underground HWDUs in the geologic repository (i.e., miscellaneous unit) are shown in Item 6, *Process Codes and Design Capacities*. In addition, two Hazardous Waste Management Units (**HWMUs**) have been designated as container storage units (S01) in Item 6, *Process Codes and Design Capacities*. One is inside the Waste Handling Building (**WHB**) and consists of the Contact-Handled (**CH**) Bay, Waste Shaft Conveyance Loading Room, Waste Shaft Conveyance Entry Room, Remote-Handled (**RH**) Bay, Cask Unloading Room, Hot Cell, Transfer Cell, and Facility Cask Loading Room. This HWMU will be used for waste receipt, handling, and storage (including storage of derived waste) prior to emplacement in the underground geologic repository. No treatment or disposal will occur in this S01 HWMU. The capacity of this S01 unit for storage is 194.1 m³, based on 36 ten-drum overpacks on 18 facility pallets, four CH Packages at the TRUDOCKs, one standard waste box of derived waste, two loaded casks and one 55-gallon drum of derived waste in the RH Bay, one loaded cask in the Cask Unloading Room, 13 55-gallon drums in the Hot Cell, one canister in the Transfer Cell and one canister in the Facility Cask Unloading Room. The second S01 HWMU is the parking area outside the WHB where the CH and RH Package trailers and the road cask trailers will be parked awaiting waste handling operations. The capacity of this unit is 50 CH Packages and twelve RH Packages with a combined TRU mixed waste volume of 242 m³.

EPA ID Number: NM4890139088

Hazardous Waste Permit Part A Form

Narrative to Item 6. Process Codes and Design Capacities (continued)

The HWMUs are shown in Appendix B3.

A CH TRU mixed waste volume of up to 186,000 m³ could be emplaced in Panels 1 to 8, 11 and 12 and an RH TRU mixed waste volume up to 3,935 m³ could be emplaced in Panels 4 to 8, 11 and 12 for a total of 189,935 m³, as shown in Item 6, *Process Codes and Design Capacities*.

RCRA PART A APPLICATION CERTIFICATION

The U.S. Department of Energy (DOE), through its Carlsbad Field Office, has signed as “owner and operator,” and Nuclear Waste Partnership LLC, the Management and Operating Contractor (MOC), has signed this application for the permitted facility as “co-operator.”

The DOE has determined that dual signatures best reflect the actual apportionment of Resource Conservation and Recovery Act (RCRA) responsibilities as follows:

The DOE’s RCRA responsibilities are for policy, programmatic directives, funding and scheduling decisions, Waste Isolation Pilot Plant (WIPP) requirements of DOE generator sites, auditing, and oversight of all other parties engaged in work at the WIPP, as well as general oversight.

The MOC’s RCRA responsibilities are for certain day-to-day operations (in accordance with general directions given by the DOE and in the Management and Operating Contract as part of its general oversight responsibility), including, but not limited to, the following: certain waste handling, monitoring, record keeping, certain data collection, reporting, technical advice, and contingency planning.

For purposes of the certification required by Title 20 of the New Mexico Administrative Code, Chapter 4, Part 1 (20.4.1 NMAC), Subpart IX, §270.11(d), the DOE’s and the MOC’s representatives certify, under penalty of law that this document and all attachments were prepared under their direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on their inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of their knowledge and belief, true, accurate, and complete for their respective areas of responsibility. We are aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
