Follow-up on WIPP 40 CFR 191 Compliance Plan

Connie Soden, Environmental Safety and Health Division, DOE-AL

In response to action items discussed at the July 23, 1986, meeting at DOE-HQ, enclosed is a copy of the WIPP 40 CFR 191 Compliance Plan and an updated compliance plan flow chart for transmittal to Headquarters. We should formalize a request for Headquarters review and concurrence with the compliance plan.

Please keep us informed of any feedback so that we can respond quickly and efficiently to any concerns which may be raised. In addition, we are prepared to make a presentation on the compliance plan similar to the one made on July 23, 1986, to EPA following the Headquarters review.

Please direct any questions concerning the details of the compliance plan or aspects of WIPP compliance with 40 CFR 191 to me or Dick Crawley of my staff.
