New Mexico Environment Department
1190 St. Francis Drive
Santa Fe, New Mexico 87502

Dear Ms. Espinosa:

Judy

At the next quarterly review meeting scheduled for October 20, 1994, the Carlsbad Area Office will discuss the Systems Prioritization Method Iteration One (SPM-1). Enclosed is an advance copy of this document for your review prior to this meeting. It is important to remember that the SPM-1 was to demonstrate the process and does not incorporate all stakeholder concerns. A major conclusion is that the SPM is a viable process to support decision making.

In addition, I will discuss the SPM-1 report at the next Stakeholder Exchange meeting on October 27-28, 1994, in Albuquerque. Your questions and comments concerning the SPM process are of great interest to us. I look forward to continuing to work with you on this important activity.

Sincerely,

George E. Dials
George E. Dials
Manager
