4/30

6 April 1995

To: Steve Zappe--NMED

From: Tom Zordan--NAS/WIPP Committee 

Subject: Meeting Date

As we have discussed, the NAS/WIPP Committee is preparing a formal report on WIPP. One of the topics that will be included in the report is Compliance Issues. Chris Whipple and I are preparing this section and would like to meet with you and others in your office to discuss topics of mutual interest.

The WIPP Committee will be meeting in Albuquerque on 27-28 April 1995. Chris and I can drive to Santa Fe on the 26th or the 27th for a late afternoon meeting. Both days are available for us. Please select the one that is most convenient for your office.

Our interest in meeting with you is to discuss technical issues that are important to WIPP that cut across multiple regulatory compliance programs. As you are aware, some key technical issues are important both to the operational phase and the post-closure phase; similarly, some technical issues are important both to the radioactive waste and the hazardous waste aspects of compliance. As we delve into these technical issues, we want to be sure that we are addressing them as completely as possible.

Our interest is in the technical factors associated with compliance; we recognize that NMED is reviewing permit applications from the WIPP and we have no interest in discussing either the review process or the status of regulatory decisions.

Once you have had a chance to discuss the schedule with Benito and Barbara, please call me at (412)-~~722~~-2156 so we can work out the details.
