P. O. Box 3090  
Carlsbad, New Mexico 88221

**MAY - 4 1995**

Dear Colleague:

As you may be aware, the Carlsbad Area Office has been implementing a decision-aiding program called the Systems Prioritization Method (SPM) to enable me to decide which path of experiments, engineered alternatives, and changes to the waste acceptance criteria would best lead to regulatory compliance for the Waste Isolation Pilot Plant. The baseline for this effort has been established with considerable stakeholder input. I am pleased to announce that the results of SPM-2 are now available.

I pledged that the full results of this program would be made available to you. Not only am I now fulfilling this pledge, but I am happy to announce that I am providing you with considerably more capability than I promised. The CD-ROM accompanying the report has the complete results of the SPM-2.

To ensure that the data is as easy to use and useful as possible, I have also included considerable help files and references. Thus the data and analysis has been made as accessible as it is presently possible to do.

If you have any questions regarding this product, please feel free to call Mr. Robert Bills of my staff at (505) 234-7481.
