RE: Proposal to Provide RCRA Part B Permit Application  
Review and Evaluation

Dear Mr. Hawley:

Camp Dresser & McKee Inc. (CDM) is pleased to submit this proposal for the review of the Resource Conservation and Recovery Act (RCRA) Part B Permit application and other technical documents as directed by the State of New Mexico for the Department of Energy's (DOE) Waste Isolation Pilot Plant (WIPP). CDM will provide the NMED with comprehensive and cost-effective services for an accurate and complete review of the RCRA Part B Permit application. CDM will also determine if notices of deficiencies exist in the current permit application in the permit and respond to any comments received from the permit applicant.

There are three critical success factors which we have incorporated into our approach:

- Technical expertise: The proposed project team has the experience necessary to meet the objectives of this project.
- Timeliness: CDM will conduct the project scope of work in a timely and cost-effective manner to the benefit of the New Mexico Environment Department (NMED).
- Teamwork: CDM will work closely with NMED staff throughout the duration of this project.

CDM has assembled a project team to complete the required scope of work consisting of various professional scientists and engineers. Each individual has extensive experience in RCRA hazardous waste work, with a significant group focus on the preparation, review and evaluation of Part A and B Permit applications. Supplemental CDM staff members, with superior experience in fields related to this project, will be available upon request throughout the duration of this scope of work.

CDM appreciates the opportunity to submit this proposal and we look forward to working with the NMED on this important project. If selected, we are prepared to begin immediately. Please do not hesitate to contact us at (800) 880-3077 with any questions or if the NMED requires additional information.

Sincerely,

CAMP DRESSER & McKEE INC.
