September 6, 1996

Dear Colleague:

In April 1996, the Carlsbad Area Office (CAO) approved for publication the *Transuranic Waste Characterization Sampling and Analysis Methods Manual*, Revision 1, DOE/WIPP 91-043. During subsequent distribution of the controlled copies of the manual, the CAO learned that the printed copies were missing three sections at the end of the document.

Enclosed are sections 630, *Atomic Mass Spectrometry Analysis*; 640, *Atomic Emission Spectroscopy Analysis*; and 650, *Atomic Absorption Spectroscopy Analysis*, which were missing from your controlled copy of the document that the CAO previously distributed to you.

Upon receipt of this letter, please add the three enclosed sections to chapter 6.0, *Inorganics*, of your controlled copy of the document and return the original signed copy of this letter to the address shown below. It is important that you provide all three items on the signature line (i.e., signature, date of signing the form, and the number of your controlled copy). If you no longer need this document, please return it in its entirety, including the three sections enclosed, with a note to that effect to the address below. We will update our database and remove your name from our distribution list. I take responsibility for the omitted sections in your earlier document because the document is under my control and apologize for any inconvenience this retransmittal may have caused you. If you have any questions about these instructions, please call me at (505) 234-7475. Thank you.

Mail letter to: Document Services
Westinghouse Electric Corporation
