Subject: LANL Audit schedule

Message:

I just received the tentative schedule for the LANL audit next week, and I have a request. I will be attending a meeting in Albuquerque on Tuesday with other members of the NMED in discussions with Al Alm concerning Project 2006, and will be unable to attend the Acceptable Knowledge portion as currently scheduled. Would it be possible for you to reschedule it for any other day (Wednesday or Thursday) so I can attend it? Thanks!

Also, whatever information you can provide me on your "Generator's Guide" and procedures for certifying sites would be extremely helpful. I provided our legal staff with background info on the audit process and the audit results at RFETS, and they agree with me that the actual certification process is not fully described in the application. However, I believe the information you have been developing would help us ensure the draft permit contains sufficient detail on the process.

I will be out of the office Friday, 8/15, and probably won't have a chance to check my e-mail before heading up the hill on Monday morning, so a reply to this message is optional. See you next week!
