

DATE: October 10, 1997

TO: American Nuclear Society Special Session Participants,
Schedulers and Helpers

FROM: Gerry Motl

SUBJECT: ANS Special Session, "WIPP: The Cornerstone to Cleanup
for the DOE Complex", American Nuclear Society Winter Meeting,
Albuquerque, New Mexico, November 17th, 1997

To Benito
I am going to
this session as
a speaker. Would you
be adding him to the
list?
Ed
JTA -
Steve B

This is a second memo to update speakers, schedulers and helpers on the status of the special ANS session on WIPP scheduled this November.

Attached is the final list of the names of speakers and others who are involved in the session. There are two slight changes from the previous memo. First, Dr. Durand Smith, the New Mexico Science Advisor, will represent Governor Johnson as a speaker. Secondly, Beth Hale was added to the list of names as a local Albuquerque SAIC helper.

As a reminder, the session will be held in the Albuquerque Convention Center from 4:00-6:00PM on November 17th. We envision that each participant will make brief remarks (5-8 minutes) during the first half of the 2-hour session. Stan will then open the session up to questions/comments from the floor. Since no handouts or visuals are required, the speakers remarks can be candid and reflect the up-to-date status of WIPP as we find it in November. We expect a stimulating session that will be of great interest to all ANS members and meeting attendees.

We are going to try to have a little reception before the special session to give the speakers the opportunity to meet Stan Hatcher and each other. I'll pass on the details later.

We are looking forward to a great session and really appreciate your participation. If you have any questions, please call me at 513/721-2668. Stan Hatcher and I look forward to seeing all of you in November!
