Stakeholders invited to comment on *Paths to Closure* strategy documents

Interested in the U.S. Department of Energy's (DOE) effort to clean up as many sites as possible by 2006? If so, you have another opportunity to comment. The DOE Office of Environmental Management has released its draft strategy titled *Accelerating Cleanup: Paths to Closure*. Site-specific strategies, including the Carlsbad Area Office's strategy, were released simultaneously. All of these strategies are available to the public.

Stakeholders are invited to comment on any of the strategies. Comments will be considered in the development of the initial *Paths to Closure* strategies that are scheduled for release later this year. The strategies will be updated annually.

A 60-day comment period will end on April 30. To request copies of either the national or the Carlsbad Area Office's *Paths to Closure* strategy documents or to obtain information on where to submit comments, call the WIPP Information Center at 1-800-336-WIPP (1-800-336-9477). More information is available on the World Wide Web at <http://www.em.doe.gov> or on the National Transuranic Waste Program Home Page at <http://www.wipp.carlsbad.nm.us>.
