COMMENTS

J.R. -

As a follow-up to our previous conversations regarding procedures relevant to the principle and application of co-detection, please add NMED to the controlled document list for the WIPP procedures manual WP 12-HP. I have already received the two individual procedures, WP 12-HP1100 (Radiological Surveys) and WP 12-HP3500 (Airborne Radioactivity), from you via fax earlier this afternoon. Thank you for your continued help.
