Bob -

I checked with our records person, and she said we have around 425 names on our WIPP mailing list. This represents those people who responded last fall to keep their name on the list, and those people who added their names afterwards in response to the web site or other reasons.

We can either provide you with printed labels, or give you an electronic copy of the file in FileMaker Pro format. I'm sure we can export to a variety of formats for importing to your database of choice. Let me know which you prefer, and when you want it.

By the way, I spoke with Harold last week, and suggested that DOE provide us with clean copies of figures for the permit to replace those figures which have "squiggles" indicating revision. I believe it would be best to have all clean figures for the final permit. Just a heads up... I'm not sure who he is tasking with that.

Call or e-mail with questions.

Steve
