Re: Request for assessment of equivalence of proposed liner system
Bloomfield Refining Company
NMD089416416

Dear Mr. Hawley:

The Environmental Protection Agency (EPA) has reviewed your request dated September 2, 1993, for an assessment of equivalence of a proposed liner system to meet compliance with the minimum technological requirements (MTRs) of RCRA Section 3004 (o)(1) and (o)(5)(A). The EPA has determined that the installation of the additional sequence of liners to the already existing liner system will be equivalent to the MTRs as defined under 40 CFR Subpart K §264.221.

You should now submit the information required under 40 CFR 264 Subpart K detailing how you will retrofit by March 29, 1994, the three surface impoundments which treat waste water outfall from the API separator at Bloomfield Refining Company.

Should you have any questions, please contact Barbara Driscoll at (214) 655-7441.

Sincerely,

William K. Honker, P.E.
Chief
RCRA Permits Branch (6H-P)
