Re: Additional Information

Dear Mr. Pullen:

Thank you for visiting the refinery on March 4. It was nice to meet you and Greg and to share the valuable information that was discussed by all.

Copies have been made of the relevant data that you and Greg had flagged and are included with this letter. Please note that the last of the analyses from the river sampling has not been received. Copies of that data will be forwarded to you when it is received.

Giant will continue to move forward with the voluntary investigation and characterization that was discussed in the meeting. By accumulating data now, Giant will be able to submit a remediation plan and implement the plan in a timely manner.

The copy of the CME at this facility in 1989 shows that there is some work to be accomplished at this site. Some tasks are complete and an inspection will be made to assure that the other tasks are completed also. I am looking forward to working with you during the facility's semi-annual sampling event in May.

Again, it was nice to meet you. If you need additional information please contact me at (505) 632 8013.

Sincerely:

Lynn Shelton
Environmental Manager
Giant Refining Company - Bloomfield
