Cindy

Please revise the future tables to denote "zero" as (i.e., no product measured (NPM) and no water measured (NWM)) something other than zero as the zero is misleading. Please include any footnotes accordingly.

For clarification when you state the well is dry, does Giant means no water or product was measured in the well. (Please include as a footnote)

Finally are there corresponding observation or collection wells to the following:

- An observation well that corresponds with CW 8 +45
- An observation well that corresponds with CW 25 +95
- A collection well that corresponds with OW 25 +70

Thank you

Hope

Hope,
OW5 + 50 is not dry. The depth of the well is 14.09 and we are reading separate phase hydrocarbon at 13.2 - 13.3. We are not getting a reading of any **water** in that well. If a well is dry - we indicate that it is dry.
Thanks,
Cindy

Cindy

Just to clarify, OW 5 + 50 under the DTW column is zero, zero is the same as dry correct?

Thanks

Hope
