**RE: Requesting Closure Plan for the
Permitted Land Treatment Unit**

Dear Mr. Pavlich:

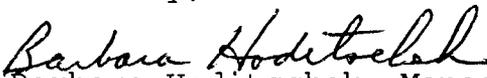

Your letter of March 28, 1994 states that you will submit the results of the "characterization sampling event" and a modified closure/post-closure plan within 90 days of the Hazardous & Radioactive Materials Bureau's approval of the characterization plan. Rather than to delay submittal of the closure/post-closure plan until the characterization plan is approved and analytical results are completed, we are requesting that you submit the proposed closure/post-closure plan complete with a new revision of characterization plan. Changes in the characterization must be based on concerns addressed in the attachment.

Also, we will need the entire text of the closure/post-closure plan (including the characterization plan) on a 3½ inch floppy disk (Word Perfect, Version 5.2 format). Your last submittal did not include the entire text of the characterization plan on disk.

Considering that discussions for closure of the Land Treatment Unit have taken place since February, 1994, we are requesting submittal of the above mentioned plans within 30 days of your receiving this letter.

If you have any questions about this request, please contact Tom Tatkin at (505) 827-4308.

Sincerely,

Barbara Hoditschek, Manager
RCRA Permits Program
Hazardous & Radioactive Materials Bureau

Enclosure
