> Dear Hope, Wayne, and Dave,
>
> As shown on drawings numbered 11105-1,2, & 3 Giant proposes to
> complete the excavation
> at SWMU #8 (Railroad Rack Lagoon) as follows:
>
> At sample sites E-1-Wall S and W-1-Wall N excavate 25 feet lengthwise, 8
> feet wide, and to the
> bottom of the existing site. Field testing using Sensidyne gas detector
> tubes #187S will be done
> initially, with confirmation samples taken once no contamination is
> otherwise detectable.
> Two (wall) samples would be taken and two from the base of each site.
> These would be taken
> from previously undisturbed soil.
>
> The old inlet pipe will be excavated in increments of approximately 25
> feet as per drawing # 11105-1.
> As each 25 foot section is removed, field testing will be done to
> determine when it is appropriate to
> take confirmation samples.
> For each 25 foot section two samples will be taken from each wall 6 to 12
> inches below pipes original
> elevation. Two samples will be taken from bottom of hole for each 25 feet.
> These will all be taken from
> undisturbed soil.
>
> If you have any questions or concerns regarding this proposal, please call
> me at 505-722-0258 or
> Ed Riege at 505-722-0217.
>
> Thanks, Steve Morris <<11105_1.jpg>> <<11105_2.jpg>> <<11105_3.jpg>>
