Subject: Conference call 8/9/05 @ 2:00 p.m.
Attachments:

Ed

Below is a summary of our conference call.

1. Giant will provide NMED with a list of wells that will be sampled in the next few weeks and send or email a draft of depth to water levels for those wells.
2. collect an effluent sample from AL2 to Evaporation Pond 1 and use the same analytical suite that GWM #1 was analyzed for (BTEX, MTBE, and gen chem.)
3. check on GWM #1 boring log and the clarify the "Material Characteristics" discrepancy at 21.5 – 24 feet (depth the sand and gravel was found). Also determine if the well was drilled to 40 feet and then backfilled to 24 feet.

If you have any questions, please contact me.

Sincerely

Hope Monzeglio
