Subject: Ciniza Weekly Update 5/5/06

Paul Ledbetter with Fusion Lining Service was here today to look at the proposed firewater/stormwater pond. He will be sending us a proposal in a little over a week.

Oscar with Refchem has been authorized to bring his crew out this week end to get started on the Pond #2 clean up.

The field work portion of the leak dye study has been completed with no crossover found between the process sewer and stormwater sewer systems. Regina Allen with Trihydro Corp. will be sending us a report as soon as she can get it completed. We will forward that along as soon as we get it.

Hall Env. Lab didn't receive the Pond #2 inlet sample dated 4/20/06 within the 48 hour limit so the attached PDF has COD only. We will try and make sure this does not happen in the future.

RE: Evap. Pond #2 Inlet 4/20/06

Order No.: 0604228

Dear Steve Morris:

Hall Environmental Analysis Laboratory received 1 sample(s) on 4/25/2006 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent.

Reporting limits are determined by EPA methodology. No determination of compounds below these (denoted by the ND or < sign) has been made.

Please don't hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Business Manager

Unless otherwise noted, all samples were received in acceptable condition and all sampling was performed by client or client representative. Sample result of ND indicates Not Detected, ie result is less than the sample specific Detection Limit. Sample specific Detection Limit is determined by multiplying the sample Dilution Factor by the listed Reporting Detection Limit. All results relate only to the items tested. Any miscellaneous workorder information or footnotes will appear below.

Analytical results are not corrected for method blank or field blank contamination.
