Subject: Ciniza Fire
Importance: High

Hope:

We had a fire here on late Sunday night/early Monday morning. The fire was confined to a heater in our diesel hydrotreating unit. We will be submitting the OCD Form C-141 to OCD within next couple business days. We will cc you on it. Fire water which entered the drains was all completely treated in the new API. All 5 aerators are working in the lagoons.

Most fortunately no one was injured.

If you have any questions please call or email.
Regards,

Jim Lieb
