Subject: Monitoring wells at the New API Separator

Eileen

I just received your letter pertaining to the drilling activities that will take place at the Western Refining Gallup Refinery. The letter states the "well installation and sampling will be in accordance with Kleinfelders December 12, 2007 letter and the New Mexico Environment Department-Hazardous Waste Bureau's (NMED-HWB) December 20, 2007 approval letter."

Note all requirements established in NMED's October 15, 2007 letter (Notice of Disapproval Monitoring Well Installation Report) must be followed. NMED's December 20, 2007 letter was an approval of Klein elders extension request and provided one condition.

If you have any questions let me know.

Thanks
Hope
