Western Gallup (Cinica)

<b>COMMUNICATION RECORD</b>		Job No.
Phone: Rajen Gaurav	Route to:	Date: 8/2/08 and 8/7/08
		Time: ~7:50 am and 10:45 pm
	Phone No.	Recorded By: hm

Subject: Western Refining Southwest, Inc. Gallup Refinery.

August 2, 2008 – Rajen called to inform NMED that a spill occurred at a product tank. The spill resulted from a malfunction in the automated system and not operator error. He did not have any details but would provide more details later. Rajen called on August 4<sup>th</sup> to let NMED know that he filed a C-141 form and sent it via mail, the spill was premium gasoline and the details are provided in the C-141 form.

August 7, 2008 – Rajen left a voice message ~10:45 pm. There was another spill next to the Marketing #2 Tank. He had tried calling earlier but our phones were busy (there was a power outage in our building, phones were not working). The spill was caught early and Rajen thought the spill was less than 5 barrels. The spill was contained in the bermed area. Rajen will mail a C141 report with more details of the spill and cleanup.
