Describe Cause of Problem and Remedial Action Taken.\* At approximately 1500 hrs (5/23/2009), a Maintenance employee was making rounds and saw T-108 (Alkylolation Tank) running over. The on-site Fire Department was immediately notified. The rundown was immediately switched out of the tank. Safety and the Off-Site Manager was notified of the incident. The Alkylolation Tank (T-108) is located within a Tank Farm Berm. The on-site Fire Department personnel put foam over the affected area as a precaution. Veolia Environmental Vacuum Services was called out to cleanup the material. The estimated recovery was approximately 6 to 8 bbls.

Describe Area Affected and Cleanup Action Taken.\* The Alkylolation Tank (T-108) is located within a Tank Farm Berm area. The affected area was approximately 225 sq ft. Cleanup operations of the soil are underway for analytical testing and shipment off-site for disposal.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
