Subject: 3rd Quarter Results for OW-30, 50 and 52 wells and PW-3
Attachments: 1010069.pdf; 1010067.pdf

Good morning: Attached are the 3rd quarter Hall Lab results for OW-30, 50 and 52 wells along with the re-sample of PW-3.

OW-30 – Non-detect for BTEX. MTBE remains at 1.1ppm above the RRSL standard of 0.012 ppm. As you will note on the Hall Lab Report, extraction time exceeded the holding time of 7 days for EPA 8270 analysis (lab error). Even though the analysis came back as non-detect for EPA 8270, I will collect another sample and have Hall Labs re-run the test for 8270 only.

OW-50 and 52 – Non detect for BTEX + MTBE.

If you have any questions, please call or e-mail. Thank you, cj.
