Subject: Sampling

Beck,

I had a letter drafted to send out on Friday to go back to 2x/week sampling, but the lab report from Hall came in today for November 13th and the benzene is over (790ug/L). So, continue to sample daily. It seems like the benzene levels increase every month or so to the point where they go over (there have been exceedences in June, August, September and November). Hopefully, you all can figure out a way to stop this from happening, so that you can be in compliance and sample less often.

If you have any questions, please contact me.

Thanks,
Kristen

Emails sent to me have been bouncing back to the sender, so I may not receive them. Please cc: Dave Cobrain dave.cobrain@state.nm.us on emails. Thanks!
