**Subject:** RE: Gallup Refinery - Comments to NMED HWB re Draft Hazardous Waste Permit for WRSI

Allen,

Since the formal comment period ended in 2011, NMED considers these comments and the comments received in March 2013 to be informal comments and for discussion purposes only. No formal written response to these or the March 2013 comments will be provided by the Department since both sets of comments were received well over a year past the end of the extended public comment period for the draft permit.
