Hey Kristen,

Sounds good. I've been in the refinery this afternoon looking at the naphtha spill site. I thought we were going to start excavating the area over the line that leaked, but they still have it taped off. The line that leaked naphtha goes to T-567. I'll be completing an initial C-141. I want to get a clean-up plan written so I can submit that with the form. I can send you coordinates or a map where I saw the leak if you need it.

I'll get with our Admin first thing in the morning after our Morning Meeting to get your data. I realized last week I don't have a CD or DVD on my laptop! I don't think I've ever not had a computer without one. I also talked with our Lab Manager, Bose', and she sent me last month's sampling, but I told her to send me data from last year till current.

Thanks,

Bill

Hi Bill-

Carl Chavez called and said he spoke to you. He said that he suggested that NMED could use the electronic files uploaded to the OCD FTP site. The RCRA Permit requires an electronic copy (CD or DVD) and paper copies for submittals, so we can't rely on OCD's electronic filing system for that. For things like the C141 report, a copy by email is ok.

Also, which tank was the pipeline that leaked the NAPHTHA connected to?

Thanks,
Kristen
