Dear Mr. Kieling:

Marathon Petroleum Company LP (Marathon) (dba Western Refining Southwest, Inc.) Gallup Refinery originally scheduled the well installations of OW-58 twin well (OW-58A) and five up-gradient MKTF wells to begin on July 30, 2019. The subsurface investigation of Tank 570 took precedence over this investigation. Marathon intended to begin the well installations after the Tank 570 subsurface investigation. The drilling contractor had a conflict in their schedule and mobilized offsite.

Marathon has recently secured the services of another drilling contractor and will begin the well installations on October 10, 2019. In addition, Marathon has arranged to conduct the investigation work plans for SWMU 13 and the Sanitary Lagoon in the same field mobilization. If there are any questions, please contact me at 505-726-9745.

Sincerely,
Marathon Petroleum Company LP, Gallup Refinery
