MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 12 January, 2011
USACE Contract No. W912DY-10-D-0014 / Task Order No. 0002

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 1 each monitoring wells, KAFB-106045 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 2 each, Rinchem roll-offs, S/N 20B-28; and 104053 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Well KAFB-106045 Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings from monitoring well installation and the associated plastic liners from the rolloff containers, to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the drill cuttings are discussed below.

During December 2010, Shaw E&I directed the installation of groundwater monitoring well KAFB-106045 at the Kirtland AFB Bulk Fuels Facility (BFF). The well is located in the southwestern corner of the BFF area outside of the known fuel plume.. The monitoring well was drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in three plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 35 cubic yards of soil drill cuttings were generated and stored in three 20-cubic yard rolloff containers at the well location. Two of the rolloffs contained dry soil drilling cuttings and were sampled on 28 December 2010. The third rolloff contains saturated cuttings and will be sampled and submitted for disposal at a later date.

A composite sample was collected from each of the two rolloff containers (Nos. 20B-28 and 104053) and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the two composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E&I requests your review of the attached analytical data and determinationfor disposal at the Kirtland AFB C&D landfill. Upon receiving notification of acceptance for disposal, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper, PG
Project Manager

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106044, KAFB-106139, and KAFB-106045
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in our rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cutting are discussed below.

During January 2011, Shaw E&I installed two groundwater monitoring wells (KAFB-106044 and KAFB-106045) and one soil vapor monitoring well (KAFB-106139) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106044 and KAFB-106045wells are located in the southwestern corner of the BFF area, which is outside of the known fuel plume on the groundwater. The KAFB-106139 well is located along Randolph Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 30 to 35 cubic yards of soil drill cuttings were generated for each 40-cubic yard rolloff container and one rolloff each is stored at the three well locations.

A composite sample was collected from the rolloff containers (20B001, 20B-27, and 104056) and sent to Hall Environmental Analysis Laboratory for testing. Rolloff containers are hauled and owned by Rhino Environmental SVCS, Inc. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino with rolloff numbers 20B001, 20B-27, and 104056.

Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106044, KAFB-106139, and KAFB-106140
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in our rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cutting are discussed below.

During January 2011, Shaw E&I installed one groundwater monitoring well (KAFB-106044) and two soil vapor monitoring wells (KAFB-106139 and KAFB-106140) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106044 well is located in the southwestern corner of the BFF area and the KAFB-106140 well is located along the southern perimeter of the BFF area, both of which are outside of the known fuel plume on the groundwater. The KAFB-106139 well is located along Randolph Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container and one rolloff each is stored at the three well locations.

A composite sample was collected from the rolloff containers (104052, 104057, 104050, 104051, and 20B-29) and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include - 104052, 104057, 104050, 104051, and 20B-29. Upon receiving notification of

Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 8 February, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106044, KAFB-106139, and KAFB-106140 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 4 each monitoring wells, KAFB-106109; KAFB-106113; KAFB-106135 & KAFB-106137 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 6 each, Rhino roll-offs, S/N 104058; 20B008; 20B001;104056; A20-67; and 20B-25 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Project No. 140705
KAFB-011-0006

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 002

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106109, KAFB-106113, KAFB-106135, and KAFB-106137
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in our rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cutting are discussed below.

During January 2011, Shaw E&I installed four soil vapor monitoring wells (KAFB-106109, KAFB-106113, KAFB-106135, and KAFB-106137) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106109 well is located 300 feet east of building 1029. The KAFB-106113 well is located in the BFF area approximately 200 feet north of tank 2420. The KAFB-106135 and KAFB-106137 wells are located along the north side of Randolph Ave SE across from the BFF. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106109, one rolloff is stored at KAFB-106113, two rolloffs are stored at KAFB-106135, and two rolloffs are stored at KAFB-106137.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the

containers for disposal include - 104058, 20B008, 20B001, 104056, A20-67 and 20B-25. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Well KAFB-106109 and KAFB-106113
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During February 2011, Shaw E&I installed two soil vapor monitoring wells (KAFB-106109 and KAFB-106113) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106109 well is located 300 feet east of building 1029. The KAFB-106113 well is located in the BFF area approximately 200 feet north of tank 2420. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106109 and one rolloff is stored at KAFB-106113.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – A20-081and A20-043. Upon receiving notification of Kirtland AFB's

acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

Order No.: 1102163

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 5 sample(s) on 2/7/2011 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. Below is a list of our accreditations. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites.

Reporting limits are determined by EPA methodology.

Please do not hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Laboratory Manager

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 25 February, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106132 and KAFB-106133 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 2 each monitoring wells, KAFB-106132 and KAFB-106133 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 3 each, Rhino roll-offs, S/N 104054, 104055 and 104052 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Project No. 140705
KAFB-011-0008

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Well KAFB-106132 and KAFB-106133
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During February 2011, Shaw E&I installed two soil vapor monitoring wells (KAFB-106132 and KAFB-106133) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106132 well is located in the parking lot north of KAFB building 1044. The KAFB-106133 well is located immediately west of KAFB building 1055. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106132 and one rolloff is stored at KAFB-106133.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – 104054, 104055, and 104052. Upon receiving notification of Kirtland AFB's

acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of, said property over all or any portion of said route to destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106115, KAFB-106101 and KAFB-106108 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 3 each monitoring wells, KAFB-106115, KAFB-106101 and KAFB-106108 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 3 each, Rhino roll-offs, S/N 104050, A20-088, 20B-027 and 20B-028 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Project No. 140705
KAFB-011-0010

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Well KAFB-106115, KAFB-106101 and KAFB-106108
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During February 2011, Shaw E&I installed three soil vapor monitoring wells (KAFB-106115, KAFB-106101 and KAFB-106108) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106115 well is located approximately 150 feet north of tank 2422. The KAFB-106101 well is located at the northwest corner of the intersection of Randolph Ave SE and Ventura Ave SE. The KAFB-106108 well is located directly south of KAFB building 1025. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106115, one rolloff is stored at KAFB-106101, and two rolloffs are stored at KAFB-106108.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – 104050, A20-088, 20B-27 and 20B-028. Upon receiving notification of Kirtland

AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106130 and 106134 and Groundwater Monitoring Well KAFB-106101
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During February 2011, Shaw E&I installed two soil vapor monitoring wells (KAFB-106130 and KAFB-106134) and one groundwater monitoring well (KAFB-106101) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106130 well is located approximately 300 feet west of KAFB building 1055. The KAFB-106134 well is located along the south side of Randolph Ave SE, 300 feet east of KAFB building 1024. The KAFB-106101 well is located at the northwest corner of the intersection of Randolph Ave SE and Ventura Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106130, two rolloffs are stored at KAFB-106101, and two rolloffs are stored at KAFB-106134.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the

containers for disposal include – 20B-001, 104056, 104058, 20B-008, 104051 and 20B-029. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

17 March, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 15 March, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106110 and KAFB-106114 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 2 each monitoring wells, KAFB-106110 and KAFB-106114 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 4 each, Rhino roll-offs, S/N 20B-030, SD1102.20, 20B-25, and A20-067 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Project No. 140705
KAFB-011-012

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106110 and 106114
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During February 2011, Shaw E&I installed two soil vapor monitoring wells (KAFB-106110 and KAFB-106114) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106110 well is located approximately 350 feet west of KAFB building 1033. The KAFB-106114 well is located 300 feet northeast of KAFB tank 2526. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106110 and two rolloffs are stored at KAFB-106114.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – 20B-030, SD1102.20, 20B-25, and A20-067. Upon receiving notification of

Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Order No.: 1102748

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 4 sample(s) on 2/23/2011 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. Below is a list of our accreditations. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites.

Reporting limits are determined by EPA methodology.

Please do not hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Laboratory Manager

Order No.: 1103060

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 5 sample(s) on 3/1/2011 for the analyses presented in the following report.

This report is a revised report and it replaces the original report issued March 16, 2011.

No determination of compounds below these (denoted by the ND or < sign) has been made.

Reporting limits are determined by EPA methodology.

Please don't hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 22 March, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106111, KAFB-106118, KAFB-106129 and KAFB-106131 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 4 each Soil Vapor Monitoring Wells; KAFB-106111, KAFB-106118, KAFB-106129 and KAFB-106131 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 6 each, Rhino roll-offs, S/N SD1103.20; 104054; SD1101.20; A20-043; 104055 and 104052 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106111, KAFB-106118, KAFB-106129, and KAFB-106131
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed four soil vapor monitoring wells (KAFB-106111, KAFB-106118, KAFB-106129, and KAFB-106131) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106111 well is located 100 feet southwest of KAFB building 1033. The KAFB-106118 well is located 200 feet southwest of KAFB building 1048. The KAFB-106129 well is located 125 feet southeast of KAFB building 1041. The KAFB-106131 well is located 50 feet northeast of KAFB tank 2526.The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106111, one rolloff is stored at KAFB-106118, two rolloffs are stored at KAFB-106129, and one rolloff is stored at KAFB-106131.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the

containers for disposal include – SD1103.20, 104054, SD1101.20, A20-043, 104055, and 104052. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diana Agnew for Tom Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106116, KAFB-106118, KAFB-106119, KAFB-106128, and KAFB-106131
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed five soil vapor monitoring wells (KAFB-106116, KAFB-106118, KAFB-106119, KAFB-106128, and KAFB-106131) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106116 well is located 50 feet southwest of KAFB building 2401. The KAFB-106118 well is located 200 feet southwest of KAFB building 1048. The KAFB-106119 well is located 150 feet northwest of KAFB building 1026. The KAFB-106128 well is located 100 feet southwest of KAFB building 1032. The KAFB-106131 well is located 50 feet northeast of KAFB tank 2526.The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106116, one rolloff is stored at KAFB-106118, two rolloffs are stored at KAFB-106119, two rolloffs are stored at KAFB-106128, and one rolloff is stored at KAFB-106131.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – SD0607.20, 22027, A20-081, 22025, 22026, 20B-27, A20-088, and 22023. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

4 April, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 31 March, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Wells KAFB-106117, and Groundwater Monitoring Wells KAFB-106062, and KAFB-106076 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 3each Monitoring Wells; Soil Vapor Monitoring Well KAFB-106117, and Groundwater Monitoring Wells KAFB-106062, and KAFB-106076 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 8 each, Rhino roll-offs, S/N 104050, 104053, 104057 and A20-028 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Subject: Disposal of Soil Drill Cuttings from the Installation of Soil Vapor Monitoring Well KAFB-106117 and Groundwater Monitoring Wells KAFB-106062 and KAFB-106076
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed one soil vapor monitoring well (KAFB-106117) and two groundwater monitoring wells (KAFB-106062 and KAFB-106076) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106117 well is located just south of KAFB building 1026. The KAFB-106062 well is located 400 feet east of KAFB building 1024. The KAFB-106076 well is located just southeast of KAFB building 1032. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106117, one rolloff is stored at KAFB-106062, and one rolloff is stored at KAFB-106076.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – 104050, 104053, 104057, and A20-028. Upon receiving notification of Kirtland

AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diana Agrew for Tom Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106048, KAFB-106061, KAFB-106062, KAFB-106076, KAFB-106079 and KAFB-106082
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed six groundwater monitoring wells (KAFB-106048, KAFB-106061, KAFB-106062, KAFB-106076, KAFB-106079 and KAFB-106082) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106048 well is located 150 north of KAFB building 1044. The KAFB-106061 well is located 200 feet southeast of KAFB building 1049. The KAFB-106062 well is located 400 feet east of KAFB building 1024. The KAFB-106076 well is located just southeast of KAFB building 1032. The KAFB-106079 well is located 400 feet northeast of KAFB building 1048. The KAFB-106082 well is located in the southeast corner of the intersection of Ridgecrest Dr SE and San Pedro Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs are stored at KAFB-106048, two rolloffs are stored at KAFB-106061, two rolloffs are stored at KAFB-106062, one rolloff is stored at KAFB-106076, one rolloff is stored at KAFB-106079, and the one rolloff from KAFB-106082 was transferred on base.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – 20B-001, A20-037, A20-014, A20-033, 20B-28, A20-068, 20B-008, 20B-29, A20-074, and 20001. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diana Stegnew for Tom Cooper

USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106061, KAFB-106079 and KAFB-106082 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 3 each Monitoring Wells; Groundwater Monitoring Wells KAFB-106061, KAFB-106079 and KAFB-106082 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Waste in 4 each, Rhino roll-offs, S/N104056, A20-024, 104058 and 104051 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106061, KAFB-106079, and KAFB-106082
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed six groundwater monitoring wells (KAFB-106061, KAFB-106079 and KAFB-106082) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106061 well is located 200 feet southeast of KAFB building 1049. The KAFB-106079 well is located 400 feet northeast of KAFB building 1048. The KAFB-106082 well is located in the southeast corner of the intersection of Ridgecrest Dr SE and San Pedro Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106061, two rolloffs are stored at KAFB-106079, and the one rolloff from KAFB-106082 was transferred on base.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the

containers for disposal include – 104056, A20-024, 104058, and 104051. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106047, KAFB-106061, KAFB-106064, KAFB-106078, and KAFB-106084
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed five groundwater monitoring wells (KAFB-106047, KAFB-106061, KAFB-106064, KAFB-106078 and KAFB-106082) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106047 well is located 100 feet north of KAFB building 1044. The KAFB-106061 well is located just southeast of KAFB building 1032. The KAFB-106064 well is located 300 feet east of KAFB building 1024. The KAFB-106078 well is located 300 feet southeast of KAFB building 1049. The KAFB-106084 well is located in the southeast corner of the intersection of Ridgecrest Dr SE and San Pedro Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106047, one rolloff is stored at KAFB-106061, three rolloffs are stored at KAFB-106064, two rolloffs are stored at KAFB-106078, and the one rolloff from KAFB-106084 was transferred on base.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Some of the rolloff containers are owned by Rhino Environmental SVCS, Inc. and the numbers on the containers for disposal include – SD1102.20, SD0608.20, SD0606.20, SD0605.20, 20B-25, 20B-30, and A20-067. The other rolloff container is owned by Bellio and the number on the container for disposal is 10. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106047 and KAFB-106081
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During March 2011, Shaw E&I installed two groundwater monitoring wells (KAFB-106047 and KAFB-106081) at the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106047 well is located 100 feet north of KAFB building 1044. The KAFB-106081 well is located 200 feet northeast of KAFB building 1024. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106047 and the one rolloff from KAFB-106081 was transferred on base.

A composite sample was collected from each of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 12, 413803, and 413810. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Dale J. Hoe for TC

RE: KAFB BFF

Order No.: 1103932

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 3 sample(s) on 3/24/2011 for the analyses presented in the following report.

This report is a revised report and it replaces the original report issued April 8, 2011.

No determination of compounds below these (denoted by the ND or < sign) has been made.

Reporting limits are determined by EPA methodology.

Please don't hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Laboratory Manager

DEPARTMENT OF THE AIR FORCE
377th Civil Engineer Division (AFMC)

19 April, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 18 April, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106046, KAFB-106063, KAFB-106078, KAFB-106081 and KAFB-106084 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 5 each Monitoring Wells; Groundwater Monitoring Wells KAFB-106046, KAFB-106063, KAFB-106078, KAFB-106081 and KAFB-106084 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Bellio Trucking, Inc. in 6 each, S/N DB483, 413805, 413804, 413809, 413806, and 413811 roll-offs. Rhino Trucking, Inc. will delivering 10 each roll-offs, S/N 104053, 22023, 22025, 20B004, 104055, A20-043, 104054, SD1103.20, 22027, and 104059 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

April 18, 2011

Project No. 140705
KAFB-011-029

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106046, KAFB-106063, KAFB-106078, KAFB-106081, and KAFB-106084 and Soil Vapor Monitoring Well KAFB-106141
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed five groundwater monitoring wells (KAFB-106046, KAFB-106063, KAFB-106078, KAFB-106081, and KAFB-106084) and one soil vapor monitoring well (KAFB-106141) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106046 well is located 100 feet north of KAFB building 1044. The KAFB-106063 well is located 300 feet east of KAFB building 1024. The KAFB-106078 well is located just southeast of KAFB building 1032. The KAFB-106081 well is located 200 feet northeast of KAFB building 1024. The KAFB-106084 well and the KAFB-106141 are located on the southeast corner of the intersection of Ridgecrest Dr SE and San Pedro Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106046, three rolloffs are stored at KAFB-106063, two rolloffs are stored at KAFB-106078, five rolloffs are stored at KAFB-106081, three rolloffs from KAFB-106084 were transferred on base, and the two rolloffs from KAFB-106141 were transferred on base.

A composite sample was collected from twelve of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. A composite sample was collected from four of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland

AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Six of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – DB483, 413805, 413804, 413809, 413806, and 413811. Ten of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104053, 22023, 22025, 20B004, 104055, A20-043, 104054, SD1103.20, 22027, and 104059. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diana Agnew for Tom Cooper

Order No.: 1104004

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 2 sample(s) on 3/31/2011 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. Below is a list of our accreditations. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag.

Please do not hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Laboratory Manager

26 April, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 25 April, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106046, KAFB-106059, KAFB-106060, KAFB-106075, KAFB-106077 and KAFB-106083 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of 6 each Monitoring Wells; Groundwater Monitoring Wells KAFB-106046, KAFB-106059, KAFB-106060, KAFB-106075, KAFB-106077 and KAFB-106083 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Bellio Trucking, Inc. in 2 each, S/N 413812, and 6 roll-offs. Rhino Trucking, Inc. will delivering 9 each roll-offs, S/N 20001, 20B-29, A20-028, 20B-27, SD0607.20, A20-088, 104052, 22026, and A20-081 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

A World of Solutions™

April 25, 2011

Project No. 140705
KAFB-011-0030

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106046, KAFB-106059, KAFB-106060, KAFB-106075, KAFB-106077, KAFB-106080, and KAFB-106083) Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed seven groundwater monitoring wells (KAFB-106046, KAFB-106059, KAFB-106060, KAFB-106075, KAFB-106077, KAFB-106080, and KAFB-106083) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106046 well is located 100 feet north of KAFB building 1044. The KAFB-106059 and KAFB-106060 wells are located 200 feet east of KAFB building 1049. The KAFB-106075 well is located in southeast corner of Parking Lot D of the Veterans Medical Center. The KAFB-106077 well is located just southeast of KAFB building 1032. The KAFB-106080 well is located 200 feet northeast of KAFB building 1024. The KAFB-106083 well is located on the southeast corner of the intersection of Ridgecrest Dr SE and San Pedro Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106046, one rolloff is stored at KAFB-106059, one rolloff is stored at KAFB-106060, one rolloff from KAFB-106075 was transferred on base, three rolloffs are stored at KAFB-106077, one rolloff is stored at KAFB-106080, and two rolloffs from KAFB-106083 were transferred on base.

A composite sample was collected from eight of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. A composite sample was collected from three of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland

AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Two of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413812 and 6. Nine of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 20001, 20B-29, A20-028, 20B-27, SD0607.20, A20-088, 104052, 22026, and A20-081. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Drew Agnew for Tom Cooper

Thomas Cooper
Project Manager

377th Civil Engineer Division (AFMC)

27 April, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 26 April, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106059, KAFB-106075, KAFB-106080 and Soil Vapor Monitoring Well KAFB-106138 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106059, KAFB-106075, KAFB-106080 and Soil Vapor Monitoring Well KAFB-106138 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Bellio Trucking, Inc. in 3 each roll-offs; S/N 413808, DB496, and DB495. Rhino Trucking, Inc. will delivering 4 each roll-offs, S/N SD1101.20, A20-037, 104057, and 104050 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Project No. 140705
KAFB-011-0031

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106059, KAFB-106075, and KAFB-106080 and Soil Vapor Monitoring Well KAFB-106138
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106059, KAFB-106075, and KAFB-106080) and one soil vapor monitoring well (KAFB-106138) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106059 well is located 200 feet east of KAFB building 1049. The KAFB-106075 well is located in southeast corner of Parking Lot D of the Veterans Medical Center. The KAFB-106080 well is located 200 feet northeast of KAFB building 1024. The KAFB-106138 well is located in the southeast parking lot of the Veterans Medical Center along US Veterans Hospital Loop. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs are stored at KAFB-106059, one rolloff from KAFB-106075 was transferred on base, two rolloffs are stored at KAFB-106080, and two rolloffs from KAFB-106138 were transferred on base.

A composite sample was collected from all seven of the rolloff containers and sent to Hall Environmental Analysis Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Three of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413808, DB496, and DB495. Four of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – SD1101.20, A20-037, 104057, and 104050. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

Order No.: 1104284

Dear Pamela Moss:

Hall Environmental Analysis Laboratory, Inc. received 7 sample(s) on 4/6/2011 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. Below is a list of our accreditations. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag.

Please do not hesitate to contact HEAL for any additional information or clarifications.

Sincerely,

Andy Freeman, Laboratory Manager

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106060, KAFB-106075, KAFB-106080 and KAFB-106098
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed four groundwater monitoring wells (KAFB-106060, KAFB-106075, KAFB-106080, and KAFB-106098) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106060 well is located 200 feet east of KAFB building 1049. The KAFB-106075 well is located in southeast corner of Parking Lot D of the Veterans Medical Center. The KAFB-106080 well is located 200 feet northeast of KAFB building 1024. The KAFB-106098 well is located in the southeast parking lot of the Veterans Medical Center along US Veterans Hospital Loop. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff is stored at KAFB-106060, one rolloff from KAFB-106075 was transferred on base, two rolloffs are stored at KAFB-106080, and three rolloffs from KAFB-106098 were transferred on base.

A composite sample was collected from all seven of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Three of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413803, DB488, and DB482. Four of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 20B-25, 104058, 20B-28, and A20-074. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Project No. 140705
KAFB-011-0033

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106051, KAFB-106069, KAFB-106072 and KAFB-106074 and Soil Vapor Monitoring Well KAFB-106142 Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed four groundwater monitoring wells (KAFB-106051, KAFB-106069, KAFB-106072, and KAFB-106074) and one soil vapor monitoring well (KAFB-106142) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106051 well is located on Arizona St between Ross Ave SE and Eastern Ave SE. The KAFB-106069 well is located in USS Bullhead Memorial Park in the parking lot east of the roundabout. The KAFB-106072 well is located on Ridgecrest Pl SE between Ridgecrest Loop SE and Ridgecrest Dr SE. The KAFB-106074 well is located in Parking Lot D of the Veterans Medical Center along US Veterans Hospital Loop. The KAFB-106142 well is located on the southeast corner of San Pedro Dr SE and Ridgecrest Dr SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff from KAFB-106051 was transferred on base, one rolloff from KAFB-106069 was transferred on base, two rolloffs from KAFB-106072 were transferred on base, one rolloff from KAFB-106074 was transferred on base, and two rolloffs from KAFB-106142 were transferred on base.

A composite sample was collected from all seven of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill

cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 0606.20, 0608.20, 0605.20, 104056, A20-024, 104051, and 20B008. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

David Agnew for Tom Cooper

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106051, KAFB-106069, KAFB-106074 and KAFB-106097
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During April 2011, Shaw E&I installed four groundwater monitoring wells (KAFB-106051, KAFB-106069, KAFB-106074, and KAFB-106097) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106051 well is located on Arizona St between Ross Ave SE and Eastern Ave SE. The KAFB-106069 well is located in USS Bullhead Memorial Park in the parking lot east of the roundabout. The KAFB-106074 well is located in Parking Lot D of the Veterans Medical Center along US Veterans Hospital Loop. The KAFB-106097 well is located in the southeast corner of the southeast parking lot of the Veterans Medical Center. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106051 were transferred on base, one rolloff from KAFB-106069 was transferred on base, two rolloffs from KAFB-106074 were transferred on base, and two rolloffs from KAFB-106097 were transferred on base.

A composite sample was collected from all seven of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Five of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 20B001, A20-068, A20-067, A20-014, and A20-033. Two of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – DB483 and 413810. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Thomas Cooper
Project Manager

Note — (1) Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per _____."
(2) Where the applicable tariff provisions specify a limitation of the carrier's liability absent a release or a value declaration by the shipper and the shipper does not release the carrier's liability or declare a value, the carrier's liability shall be limited to the extent provided by such provisions. See NMFC Item 172.
(3) Commodities requiring special or additional care or attention in handling or stowing must be so marked and packaged as to ensure safe transportation. See Section 2(e) of item 360, Bills of Lading, Freight Bills and Statements of Charges and Section 1(a) of the Contract Terms and Conditions for a list of such articles.

I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name and are classified, packaged, marked and labelled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations.

2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106049, KAFB-106050, KAFB-106066, KAFB-106067, KAFB-106068, KAFB-106071, KAFB-106072, KAFB-106073, KAFB-106074, and KAFB-106100
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During May 2011, Shaw E&I installed ten groundwater monitoring wells (KAFB-106049, KAFB-106050, KAFB-106066, KAFB-106067, KAFB-106068, KAFB-106071, KAFB-106072, KAFB-106073, KAFB-106074, and KAFB-106100) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106049 and KAFB-106050 wells are located on Arizona St between Ross Ave SE and Eastern Ave SE. The KAFB-106066 well is located between the easternmost baseball field and the soccer field in USS Bullhead Memorial Park. The KAFB-106067 and KAFB-106068 wells are located in USS Bullhead Memorial Park in the parking lot east of the roundabout. The KAFB-106071 and KAFB-106072 wells are located on Ridgecrest PL SE between Ridgecrest Loop SE and Ridgecrest Dr SE. The KAFB-106073 and KAFB-106074 wells are located in Parking Lot D of the Veterans Medical Center along US Veterans Hospital Loop. The KAFB-106100 well is located in the west parking lot of USS Bullhead Memorial Park.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff from KAFB-106049 was transferred on base, three rolloffs from KAFB-106050 were transferred on base, four rolloffs from KAFB-106066 were transferred on base, one rolloff from KAFB-106067 was transferred on base, four

PLACARDS TENDERED: YES ☐ NO ☐

Note — (1) Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per _____."
(2) Where the applicable tariff provisions specify a limitation of the carrier's liability absent a release or a value declaration by the shipper and the shipper does not release the carrier's liability or declare a value, the carrier's liability shall be limited to the extent provided by such provisions. See NMFC Item 172.
(3) Commodities requiring special or additional care or attention in handling or stowing must be so marked and packaged as to ensure safe transportation. See Section 2(e) of Item 360, Bills of Lading, Freight Bills and Statements of Charges and Section 1(a) of the Contract Terms and Conditions for a list of such articles.

I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name and are classified, packaged, marked and labelled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations.

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of, said property over all or any portion of said route to destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 20 May, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106049, KAFB-106067, KAFB-106071, and KAFB-106099 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106049, KAFB-106067, KAFB-106071, and KAFB-106099 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in 6 each roll-offs, S/N's 20B28; SD1101.20;A20-81,22025, SD0607.20 and SD0606.20 and 2 roll-offs owned by Bellio Trucking, inc. with S/N's DB495 and DB496 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Project No. 140705
KAFB-011-0039

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106049, KAFB-106067, KAFB-106071, and KAFB-106099
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During May 2011, Shaw E&I installed four groundwater monitoring wells (KAFB-106049, KAFB-106067, KAFB-106071, and KAFB-106099) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106049 and well is located on Arizona St between Ross Ave SE and Eastern Ave SE. The KAFB-106067 well is located in USS Bullhead Memorial Park in the parking lot east of the roundabout. The KAFB-106071 well is located on Ridgecrest PL SE between Ridgecrest Loop SE and Ridgecrest Dr SE. The KAFB-106099 well is located in the west parking lot of USS Bullhead Memorial Park.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106049 were transferred on base, two rolloffs from KAFB-106067 were transferred on base, one rolloff from KAFB-106071 was transferred on base, and three rolloffs from KAFB-106099 were transferred on base

A composite sample was collected from all eight of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill

cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Six of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 20B-28, SD1101.20, A20-081, 22025, SD0607.20, and SD0606.20. Two of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – DB495 and DB496. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Dale A. Howe for TC

Thomas Cooper
Project Manager

26 May, 2011

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 25 May, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106043, KAFB-106065, KAFB-106070and KAFB-106090 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106043, KAFB-106065, KAFB-106070and KAFB-106090 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in 7 each roll-offs, S/N's A20-024; A20-033; A20-074; 20B008; A20-068; 104056; and 104058 and 4 each roll-offs owned by Bellio Trucking, inc. with 413810; 426461; 426465; and 423464 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 846-9014.

Project No. 140705
KAFB-011-0040

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106043, KAFB-106065, KAFB-106070, and KAFB-106090
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During May 2011, Shaw E&I installed five groundwater monitoring wells (KAFB-106031, KAFB-106043, KAFB-106065, KAFB-106070, and KAFB-106090) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106031 well is located on San Pedro Dr SE between Eastern Ave SE and Gibson Blvd SE. The KAFB-106043 well is located on Ross Ave between Dakota St SE and Florida St SE. The KAFB-106065 well is located in USS Bullhead Memorial Park between the easternmost baseball field and the soccer field. The KAFB-106070 well is located on Ridgecrest PL SE between Ridgecrest Loop SE and Ridgecrest Dr SE. The KAFB-106090 well is located on Dakota St SE between Lovelace Rd SE and Mitchell Rd SE.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. One rolloff from KAFB-106031 was transferred on base, four rolloffs from KAFB-106043 were transferred on base, two rolloffs from KAFB-106065 were transferred on base, one rolloff from KAFB-106070 was transferred on base, and three rolloffs from KAFB-106090 were transferred on base.

A composite sample was collected from all eleven of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill

cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Seven of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – A20-024, A20-033, A20-074, 20B008, A20-068, 104056, and 104058. Four of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413810, 426461, 426465, and 423464. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agrew for Tom Cooper

USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106065, and KAFB-106093 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106065, and KAFB-106093 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in 3 each roll-offs, S/N's A20-088; A20-067; and A20-037 and 3 each roll-offs owned by Bellio Trucking, inc. with 426462; DB483; and 423460 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106031, KAFB-106065, and KAFB-106093
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During May 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106031, KAFB-106065, and KAFB-106093) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106031 well is located on San Pedro Dr SE between Eastern Ave SE and Gibson Blvd SE. The KAFB-106065 well is located in USS Bullhead Memorial Park between the easternmost baseball field and the soccer field. The KAFB-106093 well is located on California St SE between Gibson Blvd SE and Eastern Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106031 were transferred on base, one rolloff from KAFB-106065 was transferred on base, and three rolloffs from KAFB-106093 were transferred on base.

A composite sample was collected from all six of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Three of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the

containers for disposal include – A20-088, A20-067, and A20-037. Three of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 426462, DB483, and 426460. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Project No. 140705
KAFB-011-0042

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106030, KAFB-106042, KAFB-106070, KAFB-106089, KAFB-106090, and KAFB-106092 and Soil Vapor Monitoring Well KAFB-106121
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During May 2011, Shaw E&I installed six groundwater monitoring wells (KAFB-106030, KAFB-106042, KAFB-106070, KAFB-106089, KAFB-106090, and KAFB-106092) and one soil vapor monitoring well (KAFB-106121) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106030 well is located on San Pedro Dr SE between Eastern Ave SE and Gibson Blvd SE. The KAFB-106042 well is located on Ross Ave SE between Dakota St SE and Florida St SE. The KAFB-106070 well is located on Ridgecrest Place SE between Ridgecrest Loop SE and Ridgecrest Dr SE. The KAFB-106089 well and the KAFB-106090 well are located on Dakota St SE between Mitchell Rd SE and Lovelace Rd SE. The KAFB-106092 well is located on California St SE between Gibson Blvd SE and Eastern Ave SE. The KAFB-106121 well is located just south of the old KAFB tank 2420.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs from KAFB-106030 were transferred on base, three rolloffs from KAFB-106042 were transferred on base, two rolloffs from KAFB-106070 were transferred on base, three rolloffs from KAFB-106089 were transferred on base, one rolloff from KAFB-106090 was transferred on base, three rolloffs from KAFB-106092 were transferred on base, and two rolloffs are stored at the KAFB-106121 location.

A composite sample was collected from all seventeen of the rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Twelve of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104051, A20-043, 104057, 104054, 20B-25, 104050, 20B-30, A20-014, A20-028, 20B-27, 22027, and 104052. Five of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413811, 6, 413806, 413805, and 413812. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 14 June, 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106029, KAFB-106088, and KAFB-106091, and Soil Vapor Monitoring Well KAFB-106123 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106029, KAFB-106088, and KAFB-106091, and Soil Vapor Monitoring Well KAFB-106123 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in nine each roll-offs, numbered 22025; 104053; 104059; 20B-29; A20-081; 22026; and 22023; and two each roll-offs owned by Bellio Trucking, Inc., numbered 413804 and 426461 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 853-2486.

Project No. 140705
KAFB-011-0043

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106029, KAFB-106088, and KAFB-106091 and Soil Vapor Monitoring Well KAFB-106123
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During June 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106029, KAFB-106088, and KAFB-106091) and one soil vapor monitoring well (KAFB-106123) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106029 well is located on San Pedro Dr SE between Eastern Ave SE and Gibson Blvd SE. The KAFB-106088 well is located on Dakota St SE between Mitchell Rd SE and Lovelace Rd SE. The KAFB-106091 well is located on California St SE between Gibson Blvd SE and Eastern Ave SE. The KAFB-106123 well is located just west of the old KAFB tank 2420.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106029 were transferred on base, three rolloffs from KAFB-106088 were transferred on base, two rolloffs from KAFB-106091 were transferred on base, and two rolloffs are stored at the KAFB-106123 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite

samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Seven of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 22025, 104053, 104059, 20B-29, A20-081, 22026, and 22023. Two of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 413804 and 426461. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Dale J. Hoe for TC

Thomas Cooper

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106034, KAFB-106041, KAFB-106058, KAFB-106096, and KAFB-106104 and Soil Vapor Monitoring Well KAFB-106120 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in twelve each roll-offs, numbered A20-074, A20-024, 104051, 104050, 104054, 104056, 20B-28, 104057, 20B-30, 104055, 20B-27, and A20-067; and six each roll-offs owned by Bellio Trucking, Inc., numbered 23, 413805, 462426, 426460, 423464, and 15 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 853-2486.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106034, KAFB-106041, KAFB-106058, KAFB-106096 and KAFB-106104 and Soil Vapor Monitoring Well KAFB-106120
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During June 2011, Shaw E&I installed five groundwater monitoring wells (KAFB-106034, KAFB-106041, KAFB-106058, KAFB-106096 and KAFB-106104) and one soil vapor monitoring well (KAFB-106120) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106034 well is located between Ridgecrest Dr SE and Gibson Blvd SE east of the Gibson Medical Center. The KAFB-106041 well is located on Ross Ave SE between Dakota St SE and Florida St SE. The KAFB-106058 well is located on Eastern Ave SE between Florida St SE and Georgia St SE. The KAFB-106096 well is located in the west parking lot of the roundabout in USS Bullhead Memorial Park. The KAFB-106104 well is located on Hertz Rd SE between Mitchell Rd SE and Lovelace Rd SE. The KAFB-106120 well is located just north of the old KAFB tank 2420.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs from KAFB-106034 were transferred on base, two rolloffs from KAFB-106041 were transferred on base, three rolloffs from KAFB-106058 were transferred on base, four rolloffs from KAFB-106096 were transferred on base, four rolloffs from KAFB-106104 were transferred on base, and two rolloffs are stored at the KAFB-106120 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Twelve of the rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – A20-074, A20-024, 104051, 104050, 104054, 104056, 20B-28, 104057, 20B-30, 104055, 20B-27, and A20-067. Six of the rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 23, 413805, 462426, 426460, 423464, and 15. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Well KAFB-106095 and Soil Vapor Monitoring Well KAFB-106122 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Well KAFB-106095 and Soil Vapor Monitoring Well KAFB-106122 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and will be in three each roll-offs, numbered 20B004, 20B-25, and A20-014 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Well KAFB-106095 and Soil Vapor Monitoring Well KAFB-106122
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During June 2011, Shaw E&I installed one groundwater monitoring well (KAFB-106095) and one soil vapor monitoring well (KAFB-106122) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106095 well is located in the west parking lot of the roundabout in USS Bullhead Memorial Park. The KAFB-106122 well is located just east of the old KAFB tank 2420. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106095 were transferred on base, and one rolloff is stored at the KAFB-106122 location.

A composite sample was collected from the groundwater monitoring well that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. The rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for

disposal include – 20B004, 20B-25, and A20-014. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 6 July 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106032, KAFB-106033, KAFB-106055, KAFB-106057, KAFB-106086, KAFB-106087, KAFB-106094, and KAFB-106103 and Soil Vapor Monitoring Wells KAFB-106122 and KAFB-106124 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106032, KAFB-106033, KAFB-106055, KAFB-106057, KAFB-106086, KAFB-106087, KAFB-106094, and KAFB-106103 and Soil Vapor Monitoring Wells KAFB-106122 and KAFB-106124 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and Bellio Trucking, Inc., and will be in eleven each Rhino roll-offs, numbered 104052, 104053, A20-081, 104058, 22026, 104059, 22027, A20-028, 22023, A20-068, and 22025; and twelve each Bellio roll-offs, numbered 12, 16, 17, 6, 426460, 426467, 413804, 413812, DB495, 27, 1, and 10 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 853-2486.

Project No. 140705
KAFB-011-0047

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106032, KAFB-106033, KAFB-106055, KAFB-106057, KAFB-106086, KAFB-106087, KAFB-106094, and KAFB-106103 and Soil Vapor Monitoring Wells KAFB-106122 and KAFB-106124
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During June 2011, Shaw E&I installed eight groundwater monitoring wells (KAFB-106032, KAFB-106033, KAFB-106055, KAFB-106057, KAFB-106086, KAFB-106087, KAFB-106094, and KAFB-106103) and two soil vapor monitoring wells (KAFB-106122 and KAFB-106124) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106032 and KAFB-106033 wells are located in the east parking lot of the Gibson Medical Center between Ridgecrest Dr SE and Gibson Blvd SE. The KAFB-106055 and KAFB-106057 wells are located on Eastern Ave SE between Florida St SE and Georgia St SE. The KAFB-106086 and KAFB-106087 wells are located on Ridgecrest Loop SE between Ridgecrest Dr SE and Ridgecrest Place SE. The KAFB-106094 well is located in the west parking lot of the roundabout in USS Bullhead Memorial Park. The KAFB-106103 well is located on Hertz St SE between Mitchell Rd SE and Lovelace Rd SE. The KAFB-106122 well is located just east of the old KAFB tank 2420. The KAFB-106124 well is located just west of the old KAFB tank 2420.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106032 were transferred on base, two rolloffs from KAFB-106033 were transferred on base, two rolloffs from KAFB-106055 were transferred on base, two rolloffs from KAFB-106057 were transferred on base,

three rolloffs from KAFB-106086 were transferred on base, three rolloffs from KAFB-106087 were transferred on base, three rolloffs from KAFB-106094 were transferred on base, three rolloffs from KAFB-106103 were transferred on base, one rolloff is stored at the KAFB-106122 location and two rolloffs are stored at the KAFB-106124 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Twelve rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104052,104053, 104055, A20-081, 104058, 22026, 104059, 22027, A20-028, 22023, A20-068, and 22025. Eleven rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 12, 16, 6, 426460, 426467, 413804, 413812, DB495, 27, 1, and 10. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Dal D. the for TC

Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During June 2011, Shaw E&I installed eight groundwater monitoring wells (KAFB-106032, KAFB-106033, KAFB-106055, KAFB-106057, KAFB-106086, KAFB-106087, KAFB-106094, and KAFB-106103) and two soil vapor monitoring wells (KAFB-106122 and KAFB-106124) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106032 and KAFB-106033 wells are located in the east parking lot of the Gibson Medical Center between Ridgecrest Dr SE and Gibson Blvd SE. The KAFB-106055 and KAFB-106057 wells are located on Eastern Ave SE between Florida St SE and Georgia St SE. The KAFB-106086 and KAFB-106087 wells are located on Ridgecrest Loop SE between Ridgecrest Dr SE and Ridgecrest Place SE. The KAFB-106094 well is located in the west parking lot of the roundabout in USS Bullhead Memorial Park. The KAFB-106103 well is located on Hertz St SE between Mitchell Rd SE and Lovelace Rd SE. The KAFB-106122 well is located just east of the old KAFB tank 2420. The KAFB-106124 well is located just west of the old KAFB tank 2420.

The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Two rolloffs from KAFB-106032 were transferred on base, two rolloffs from KAFB-106033 were transferred on base, two rolloffs from KAFB-106055 were transferred on base, two rolloffs from KAFB-106057 were transferred on base,

three rolloffs from KAFB-106086 were transferred on base, three rolloffs from KAFB-106087 were transferred on base, three rolloffs from KAFB-106094 were transferred on base, three rolloffs from KAFB-106103 were transferred on base, one rolloff is stored at the KAFB-106122 location and two rolloffs are stored at the KAFB-106124 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Eleven rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104052,104053, A20-081, 104058, 22026, 104059, 22027, A20-028, 22023, A20-068, and 22025. Twelve rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 12, 16, 17, 6, 426460, 426467, 413804, 413812, DB495, 27, 1, and 10. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 18 July 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106054 and KAFB-106085, and Soil Vapor Monitoring Well KAFB-106136 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106054 and KAFB-106085, and Soil Vapor Monitoring Well KAFB-106136 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and Bellio Trucking, Inc., and will be in three each Rhino roll-offs, numbered A20-067, A20-074, and 104050; and five each Bellio roll-offs, numbered 15, 18, 8, DB481, and DB482 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 853-2486.

Project No. 140705
KAFB-011-0049

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106054 and KAFB-106085 and Soil Vapor Monitoring Well KAFB-106136
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During July 2011, Shaw E&I installed two groundwater monitoring wells (KAFB-106054 and KAFB-106085) and one soil vapor monitoring well (KAFB-106136) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106054 well is located on California St SE between Ross Ave SE and Eastern Ave SE. The KAFB-106085 well is located on Ridgecrest Loop SE between Ridgecrest Dr SE and Ridgecrest Place SE. The KAFB-106136 well is located just north of the east playground in USS Bullhead Memorial Park. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs from KAFB-106054 were transferred on base, three rolloffs from KAFB-106085 were transferred on base, and two rolloffs from KAFB-106136 were transferred on base.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Three rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – A20-067, A20-074, and 104050. Five rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 15, 18, 8, DB481, and DB482. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Dale J. Hlom for TC

Thomas Cooper
Project Manager

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 26 July 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106037, KAFB-106040, and KAFB-106053, and Soil Vapor Monitoring Wells KAFB-106125 and KAFB-106126 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106054 and KAFB-106085, and Soil Vapor Monitoring Well KAFB-106136 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and Bellio Trucking, Inc., and will be in seven each Rhino roll-offs, numbered 104053, 22027, A20-024, 22026, 20B-30, 104051, and 22023; and five each Bellio roll-offs, numbered 19, 28, 33, 21, and 30 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

2. Please direct questions to me at 853-2486.

Project No. 140705
KAFB-011-0050

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106037, KAFB-106040, and KAFB-106053 and Soil Vapor Monitoring Wells KAFB-106125 and KAFB-106126 Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During July 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106037, KAFB-106040, and KAFB-106053) and two soil vapor monitoring wells (KAFB-106125 and KAFB-106126) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106037 well is located in the west parking lot of the church at 6200 Gibson Blvd SE. The KAFB-106040 well is located on the property south of the Ridgecrest Dr SE and Dakota St SE intersection. The KAFB-106053 well is located on California St SE between Ross Ave SE and Eastern Ave SE. The KAFB-106125 well is located just north of the old KAFB tank 2422. The KAFB-106126 well is located just east of the old KAFB tank 2422. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs from KAFB-106037 were transferred on base, three rolloffs from KAFB-106040 were transferred on base, three rolloffs from KAFB-106053 were transferred on base, two rolloffs are stored at the KAFB-106125 location, and one rolloff is stored at the KAFB-106126 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite

samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Seven rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104053, 22027, A20-024, 22026, 20B-30, 104051, and 22023. Five rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 19, 28, 33, 21, and 30. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew for Tom Cooper

MEMORANDUM FOR: 377 MSG/CEANR

FROM: 377 MSG/CEANC (Solid Waste Program Manager)

SUBJECT: Landfill Disposal

Reference: Shaw Environmental Ltr. dated: 4 August 2011
USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106036, KAFB-106039, and KAFB-106052, and Soil Vapor Monitoring Wells KAFB-106126 and KAFB-106127 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106036, KAFB-106039, and KAFB-106052, and Soil Vapor Monitoring Wells KAFB-106126 and KAFB-106127 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and Bellio Trucking, Inc., and will be in four each Rhino roll-offs, numbered 104052, 104055, 104059, and 104050; and nine each Bellio roll-offs, numbered 24, 33, 15, 16, 27, 17, 18, 6, and DB482 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Project No. 140705
KAFB-011-0051

Mr. Steve Kitt
377 MSG/CEANC
2050 Wyoming Blvd NE
Albuquerque, NM 87117-5270

Reference: USACE Contract No. W912DY-10-D-0014, Delivery Order 0002

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106036, KAFB-106039, and KAFB-106052 and Soil Vapor Monitoring Wells KAFB-106126 and KAFB-106127 Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During July 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106036, KAFB-106039, and KAFB-106052) and two soil vapor monitoring wells (KAFB-106126 and KAFB-106127) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106036 well is located in the west parking lot of the church at 6200 Gibson Blvd SE. The KAFB-106039 well is located on the property south of the Ridgecrest Dr SE and Dakota St SE intersection. The KAFB-106052 well is located on California St SE between Ross Ave SE and Eastern Ave SE. The KAFB-106126 well is located just east of the old KAFB tank 2422. The KAFB-106127 well is located just south of the old KAFB tank 2422. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Four rolloffs from KAFB-106036 were transferred on base, three rolloffs from KAFB-106039 were transferred on base, three rolloffs from KAFB-106052 were transferred on base, one rolloff is stored at the KAFB-106126 location, and two rolloffs are stored at the KAFB-106127 location.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. A composite sample was also collected from each of the SVM rolloff containers and sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite

samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. Four rolloff containers are owned by Rhino Trucking, Inc. and the numbers on the containers for disposal include – 104052, 104055, 104059, and 104050. Nine rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 24, 33, 15, 16, 27, 17, 18, 6, and DB482. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew

USACE Contract No. W912DY-10-D-0014 / Delivery Order No. 0002

Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106038 and KAFB-106106 on Kirtland AFB as part of Base Fuels Facility Site Investigation

1. Authorization is granted to Shaw Environmental to dispose of soil drill cuttings and debris in support of continued monitoring of Bulk Fuels Facility from the installation of Groundwater Monitoring Wells KAFB-106038 and KAFB-106106 at the Kirtland AFB construction and demolition landfill. Debris will be delivered by Rhino Trucking, Inc. and Bellio Trucking, Inc., and will be in one each Rhino roll-off, numbered 104051; and five each Bellio roll-offs, numbered 21, 25, 28, 29, and 30 to the landfill. Debris will consist of drill cuttings and plastic liners from roll-offs. Lab results are on file in the Solid Waste Management office. Shaw shall be issued a Kirtland AFB landfill pass for this disposal action. A copy of this letter will accompany each roll-off and be left with the gate keeper at the landfill.

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106038 and KAFB-106106
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During August 2011, Shaw E&I installed two groundwater monitoring wells (KAFB-106038 and KAFB-106106) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106038 well is located on the property south of the Ridgecrest Dr SE and Dakota St SE intersection. The KAFB-106106 well is located on Dakota St SE between Ross Ave SE and Eastern Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Three rolloffs from KAFB-106038 were transferred on base and three rolloffs from KAFB-106106 were transferred on base.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. Each composite sample was sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. One rolloff container is owned by Rhino Trucking, Inc. and the number on the container for disposal is 104051. Five rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers

for disposal include – 21, 25, 28, 29, and 30. Upon receiving notification of Kirtland AFB's acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

Diane Agnew

Subject: Disposal of Soil Drill Cuttings from the Installation of Groundwater Monitoring Wells KAFB-106035, KAFB-106105, and KAFB-106107
Kirtland AFB, New Mexico

Dear Mr. Kitt:

Shaw Environmental and Infrastructure (Shaw E&I) is requesting permission to dispose of nonhazardous soil drill cuttings and plastic liners used in rolloff containers to the Kirtland Air Force Base (Kirtland AFB) Construction and Demolition (C&D) debris landfill. The generation of and analyses performed on the soil drill cuttings are discussed below.

During August 2011, Shaw E&I installed three groundwater monitoring wells (KAFB-106035, KAFB-106105, and KAFB-106107) for the Kirtland AFB Bulk Fuels Facility (BFF). The KAFB-106035 well is located in the west parking lot of 6200 Gibson Blvd SE. The KAFB-106105 and KAFB-106107 wells are located on Dakota St SE between Ross Ave SE and Eastern Ave SE. The monitoring wells were drilled using air rotary casing hammer (ARCH) and the drill cuttings were containerized in plastic lined steel rolloffs pending laboratory analysis for waste characterization. Approximately 10 to 15 cubic yards of soil drill cuttings were generated for each 20-cubic yard rolloff container. Four rolloffs from KAFB-106035 were transferred on base, four rolloffs from KAFB-106105 were transferred on base and three rolloffs from KAFB-106107 were transferred on base.

A composite sample was collected from each of the groundwater monitoring wells that represented all rolloffs associated with that location. Each composite sample was sent to Gulf Coast Analytical Laboratory for testing. The samples were analyzed for the required parameters per the Kirtland AFB Landfill Acceptance Memorandum (January 2009). The analytical results for the composite samples confirm that the drill cuttings are not considered to be hazardous waste and meet the requirements for disposal at the Kirtland C&D landfill.

Shaw E & I requests your review of the attached analytical data and determination for disposal at Kirtland AFB C&D landfill. All eleven rolloff containers are owned by Bellio Trucking, Inc. and the numbers on the containers for disposal include – 15, 16, 17, 19, 22, 24, 25, 27, 28, 29, and 33. Upon receiving notification of Kirtland AFB's

acceptance of the soil and plastic, Shaw E&I will coordinate transport of the rolloffs and disposal of the waste with Rhino and Bellio.

If you have any questions regarding this request, please contact me at (720) 554-8163. Thank you for your assistance.

Sincerely,

for TC
