Mr. Bearzi

Kirtland AFB is submitting a Light Non-aqueous Phase Liquid (LNAPL) Containment Interim Measure Work Plan regarding the Bulk Fuels Facility Fuel Spill. An electronic copy of the work plan is included.

The subject work plan outlines our proposal for installation of a containment system designed to prevent further migration of the LNAPL plume. The work plan was not required by NMED, but is being submitted as a complimentary plan to the Interim Measures Work Plan, Part I: Field Investigation Activities, Bulk Fuels Facility Spill, Solid Waste Management Units ST-106, and SS-111, submitted to you on 5 Nov 10.

If you have any questions with regard to this submittal, please contact Mr. John Pike, 377 MSG/CEAN, (505) 846-8546.

Sincerely
