RE: Response to Notice of Intent to Discharge; Discharge Permit Not Required for Bulk Fuels Facility at Kirtland Air Force Base, KAFB-10619, AI:2404

Dear Mr. Holmes:

The New Mexico Environment Department (NMED) received a Notice of Intent on August 17, 2011 to discharge approximately 43 gallons of wastewater generated from purging ground water from monitoring well KAFB-10619 prior to sampling. The notice satisfies the requirements of Subsection A of 20.6.2.1201 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC). The proposed discharge is located at the Bulk Fuels Facility Spill Solid Waste Management Units ST-106 and SS-111, Kirtland Air Force Base, Section 36, Township 10N, Range 3E, Bernalillo County.

Based on the information and data provided in your Notice of Intent, NMED has determined that a Discharge Permit is not required as long as the discharge is as described. A Discharge Permit is not required at this time because the information and data provided indicates it is unlikely that the discharge will adversely affect ground water quality.

The proposed discharge is briefly described as follows:

Approximately 43 gallons of wastewater stored in a polyethylene tank will be discharged to the ground surface. The wastewater was generated from purging ground water from monitoring well KAFB -10619 prior to sampling. NMED requires the wastewater to be discharged at the site in a

Mark Holmes, AI:2404

August 26, 2011

Page 2

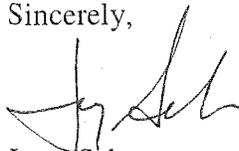

controlled manner by containing the water in the immediate area of the site and avoiding runoff into storm sewers or arroyos. The depth to ground water is approximately 500 feet.

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should your operation result in actual pollution of surface or ground waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any other applicable federal, state, and/or local laws and regulations, such as zoning requirements, plumbing codes and nuisance ordinances.

If at some time in the future you intend to change the amount, character or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your Notice of Intent, you must file a revised Notice of Intent with the Ground Water Quality Bureau.

If you have any questions, please contact Clint Marshall, Acting Program Manager of the Ground Water Pollution Prevention Section, at (505) 827-0027.

Sincerely,

Jerry Schoeppner, Acting Chief
Ground Water Quality Bureau

Dear Mr. Holmes:

The New Mexico Environment Department (NMED) received a Notice of Intent on August 17, 2011 to discharge approximately 125 gallons of wastewater generated from purging ground water from monitoring well KAFB-106081 prior to sampling. The notice satisfies the requirements of Subsection A of 20.6.2.1201 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC). The proposed discharge is located at the Bulk Fuels Facility Spill Solid Waste Management Units ST-106 and SS-111, Kirtland Air Force Base, Section 36, Township 10N, Range 3E, Bernalillo County.

Based on the information and data provided in your Notice of Intent, NMED has determined that a Discharge Permit is not required as long as the discharge is as described. A Discharge Permit is not required at this time because the information and data provided indicates it is unlikely that the discharge will adversely affect ground water quality.

The proposed discharge is briefly described as follows:

Approximately 125 gallons of wastewater stored in a polyethylene tank will be discharged to the ground surface. The wastewater was generated from purging ground water from monitoring well KAFB -106081 prior to sampling. NMED requires the wastewater to be discharged at the site in

a controlled manner by containing the water in the immediate area of the site and avoiding runoff into storm sewers or arroyos. The depth to ground water is approximately 500 feet.

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should your operation result in actual pollution of surface or ground waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any other applicable federal, state, and/or local laws and regulations, such as zoning requirements, plumbing codes and nuisance ordinances.

If at some time in the future you intend to change the amount, character or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your Notice of Intent, you must file a revised Notice of Intent with the Ground Water Quality Bureau.

If you have any questions, please contact Clint Marshall, Acting Program Manager of the Ground Water Pollution Prevention Section, at (505) 827-0027.

Sincerely,

Jerry Schoeppner, Acting Chief
Ground Water Quality Bureau
