Subject: request for 60-day extension to public comment on SNL MWL

Dear John,

I support the proposition of extending the public comment period for the SNL MWL. This site contains WWII legacy waste that was created to help protect the nation. New Mexico should not be impacted in the future by this national effort. DOE and SNL are the responsible parties to excavate and close this site rather than leaving it as a negative factor nor black mark on the future of Albuquerque and New Mexico.

I served on the WERC review of the site and participated as an observer in the second outside review as well as gave testimony at the hearing. The conclusion of the reviews was that the site should be reviewed every 5 years and the site excavated when radiation levels were low enough to permit adequately safe cleanup.

Sincerely,

Eric Nuttall.....
