INTERIM STORAGE SITE (ISS) AT TA-III

The ISS is located on the surface of the Technical Area III Inactive Waste Disposal Site, which consists of a number of fenced areas located in the northeast quadrant of Technical Area III, about 0.75 miles southwest of the Technical Area V.

The ISS is a fenced area measuring about 200 feet by 215 feet.

All waste at the ISS is stored in U.S. Department of Transportation (DOT)-approved containers. The types of containers used are 55-gallon drums, 2- by 2- by 7-foot and 4- by 4- by 7-foot DOT boxes, and transportainers.

The containers are segregated and labeled in accordance with DOT regulations. Mixed waste is separated from radioactive waste and segregated according to hazardous waste type and compatibility. Waste hardware is separated from debris or paper waste.

Access to the ISS is restricted. The key to the ISS is maintained by authorized personnel.

The mixed waste stored at the ISS is low-level mixed waste that does not exceed 200 millirad/hour at the surface of an unshielded package. No transuranic waste, special nuclear material waste, or high-level waste is stored at the ISS. No gases, liquids, or solids containing free liquids are stored. Solid wastes stored include hardware, decontamination debris such as paper and rags, protective clothing, and filings. The hazardous constituents include, but are not limited to, organic compounds and toxic and heavy metals. No explosives are stored at the ISS.

LIST OF FACILITY EMERGENCY COORDINATORS FOR INTERIM STORAGE SITE

Facility Emergency Coordinate/Alternates	Home Telephone	Office Telephone	Cellular or Pager
Primary: Jeff Jarry 10700 Academy Road NE Albuquerque, NM 87111	237-0696	848-0487	238-1155
1st Alternate: Barbara Botsford 1025 Glorieta NE Albuquerque, NM 87111	292-3679	848-0471	263-3515
2nd Alternate: Darlene Moore 3020 San Rafael SE Albuquerque, NM 87106	268-6834	848-0486	845-0142/ 1837

**LIST OF EMERGENCY EQUIPMENT
INTERIM STORAGE SITE**

Category	Description/Capabilities	Location
<u>Interim Storage Site (ISS)</u>		
Spill Control Equipment	Shovels, containers, plastic bags and sheeting. Vermiculite and charcoal absorbents.	Storage box, tool box, semitrailer in the nonclassified storage site or office transportainer outside entrance to nonclassified storage site.
Fire Extinguishers	Portable (A-B-C) (2).	Office transportainer outside entrance to nonclassified storage site; Department 7573 stakebed truck.
	Portable (Class A) (2).	Posted on fence at entrance to nonclassified storage site; posted on fence at entrance to classified storage site.
Communication equipment	Mobile phone.	On-site personnel; contractor personnel.
Alarm system	Voice command by on-site personnel.	On-site personnel.
Water	Large quantities for extinguishing large fires.	On KAFB fire tanker truck. Will only be on site if required.
Decontamination equipment	None needed since operations are not conducted at the site.	Not applicable.
